Projects (viewable on github)

GitHub Leaderboards

Web application to view a leaderboard of people you follow on GitHub. Created using Facebook's React, back end done in Node/Express, built with Gulp and styled in SCSS.

PixelSorter

Website allows users to upload an image and manipulate it to create pixel sorted artwork. Users can download the images they create, and share them on imgur. Created using javascript, canvas elements.

Portfolio Website

Personal portfolio website outlining my experience as a web developer. Responsive minimalist design created using Bootstrap/ SCSS.

Javascript API Projects

Fullstack Javascript project where I created a group of microservices in Node.js/Express /MongoDB . They include a Timestamp Microservice, a Request Header Parser Microservice, a URL Shortener, an Image Abstraction Layer, and a File Metadata Microservice.

OurJungleLife.com

Website highlighting a missionary couple's mission to Papua New Guinea to live with native tribes, and beyond. Fully responsive, created from scratch in HTML/CSS/jQuery
