- Javascript

## Front-End

- HTML
- CSS/SASS
- Bootstrap
- jQuery

## Other

- Git
  - Photoshop
  - STATA
  - Excel
- 

## Projects (viewable on github)

### ourjunglelife.com

Website highlighting a young missionary couple's mission to Papua New Guinea to live with native tribes. Fully responsive when viewed on desktop or mobile. I used the HTML/CSS/Javascript/jQuery to code the website from scratch.

### timothybauman.com

Personal portfolio website outlining my experience as a web developer. Responsive minimalist design created using HTML/Bootstrap/SASS.

### Etch-a-sketch

Web app written in jQuery that lets users draw designs on a board much like an etch-a-sketch. Includes different settings such as random colored mode and watercolor mode.

### Javascript On-Screen Calculator

A calculator where user can click on the buttons to do simple calculations. Written in Javascript.

### Google Homepage Lookalike

A replica of Google's homepage with working search field.

---

## Professional Experience

### **Freelance, Web Development** – July 2014-Present

- Created a variety of apps and websites to satisfy client needs or hone my skills
