Professional Experience

Front-End Developer, Wpromote • July 2016 - Present

- Started as Employee #2 on the create development team, helped build team & services offered, as well as company best practices & development processes.
- Built websites/ e-commerce stores/ interactive infographics/ html emails for a wide range of clients.

E-Commerce Assistant, Victor Canera Inc. • September 2015 - July 2016

- Maintained e-commerce website, helped with front-end development, optimized SEO.
- Oversaw online marketing, helped with everyday operations related to running an online business.

Freelance Web Developer • July 2014 - Present

- Created various web applications and websites to satisfy clients needs and hone my skills.
- Worked remotely with clients through multiple design iterations to create satisfactory websites.
- Used content management systems such as Wordpress, as well as creating sites from scratch.

Developer

Cabot Cheese - The Ultimate Cheese Pairing Guide

Infographic to help you select the perfect cheese/appetizer pairing. Implemented local JOSN database to increase speed/declutter DOM

Interdent/ Gentle Dental

Worked on a team of devs creating this site re-design. Built in Wordpress as a multi-site, helped build templates for Blog and FAQ pages, as well as general work on the rest of the site.

Trex Furniture - Little Chair Big Impact

An interactive infographic about how furniture affects the environment. Learned/ implemented unique CSS shape animations unique to each 'page' and are viewable from both directions on the infographic, faster than JS

Papyrus - papyrusonline.com

Created the Store Locator and Ideas & Inspiration pages, built in Magento.

Maker (some viewable on github)

Snooz

Worked with a graphic designer & a UX/UI designer to create an app with the goal of helping you become a morning person. Developed the app in React-Native. Currently available on the App Store.

GitHub Leaderboards

Web application to view a leaderboard of people you follow on GitHub. Created using Facebook's React, back end done in Node/Express, built with Gulp and styled in SCSS.
